The learned-object taxonomy

Learned object	Defining relation	Primary chapter
Solution function	$u_\theta(x,t) \approx u(x,t)$	Ch. 6, 7, 8
Solution operator	$\mathcal{G}_\theta(a) \approx \mathcal{G}(a)$	Ch. 9
Vector field / flow map	$f_\theta(x) \approx \dot{x}$	Ch. 10
Closure / constitutive relation	unknown term in a known system	Ch. 10
Parameter / coefficient field	p or $a_\theta(x)$	Ch. 5, 12
Latent state	unobserved component of the state	Ch. 13
Governing equation	sparse term selection	Ch. 11
Reduced coordinates	low-dimensional coordinate system	Ch. 11
Probability distribution	posterior / predictive distribution	Ch. 13
